AB Cytotoxic lymphocyte-inducing lipopeptides comprising a peptide fragment
 having approx. between 10 and 40 amino acids and comprising at least one
 antigenic determinant and also comprising one or more chains derived from
 fatty acids and one or more modified steroid groups useful for immunizing
 a human or animal body against pathogenic agents such as viruses or
 parasites which fragment is preferably a fragment of the protein encoded
 by the ENV gene, by the NEF gene or by the GAG gene of HIV viruses.

AB Cytotoxic lymphocyte-inducing lipopeptides comprising a peptide part having between 10 and 40 amino acids approx. and comprising at least one antigenic determinant. The lipopeptides also comprise one or more chains derived from fatty acids and one or more modified steroid groups. Said lipopeptides may be used for immunizing the human or animal body against pathogenic agents such as viruses or parasites. The peptide part may, in particular, be a fragment of the protein encoded by the ENV gene, by the NEF gene or by the GAG gene of HIV viruses. Thus, 2-tert-butyloxycarbonyl-aminohexadecanoic acid and 3.beta.-(2-carboxymethoxy)cholest-5-ene were synthesized and coupled to fragments of gp120 of HIV-1 LAV-BRU virus, and fragments of ENV protein of HIV virus for immunization.
